

CORPORATE AI TRAINING CATALOGUE

SAMIH HABBANI

Corporate AI Trainer · Microsoft Copilot & AI Business Trainer (AB-730) · Full-Stack Developer

Generative AI · Microsoft 365 Copilot · Copilot Studio · Claude Cowork & ChatGPT Work
· AI Agents · AI Governance · Full-Stack Development

Dubai, UAE — Available Onsite Across UAE & GCC — Available for International Virtual Delivery

Prepared for corporate training providers, L&D companies, consulting firms and enterprise clients across the UAE, Saudi Arabia and the GCC.

Corporate AI Trainer & Full-Stack Developer

10+ years in technology and 7+ years delivering professional and corporate training. A Full-Stack Developer background combined with hands-on corporate training experience — able to train both non-technical business audiences and technical / developer teams.

Delivered instructor-led programs through professional training organizations including M2I Formation, AFPA, WebForce3 and others. Founder & Head of Training at Web Start, a professional training center, and Founder & E-Learning Program Director at Académie WS, an online learning platform.

10+ YEARS TECHNOLOGY	7+ YEARS PROFESSIONAL TRAINING	20+ PROJECTS DEPLOYED	5,000+ LEARNERS	40+ PROGRAMS
-----------------------------------	---	------------------------------------	---------------------------	------------------------

CERTIFICATIONS

Microsoft Copilot & AI Business Trainer (AB-730) · Microsoft Certified Trainer (MCT)

TRAINING APPROACH

Practical before theoretical: training-needs analysis, a real business exercise, hands-on labs on participants' own use cases, a business application, and a reusable deliverable to take away — a prompt library, prototype or workflow.

DELIVERY OPTIONS

Onsite Corporate Training · Virtual Instructor-Led Training (VILT) · Private Team Workshops · Executive Sessions · Hands-on Technical Workshops · Customized Programs · Half Day to Multi-Day

Dubai-based · Available for onsite delivery across the UAE & GCC · Available for international virtual delivery · Training delivered in French, English and Spanish.

Learning Tracks Overview

TRACK 1 — AI FOR BUSINESS TEAMS · READY TO DELIVER

- ChatGPT for Business Professionals
- Microsoft 365 Copilot (AB-730)
- AI Agents with Claude Cowork & ChatGPT Work

TRACK 2 — AI FOR FINANCE

- AI+ Finance Practitioner™

TRACK 3 — AI FOR DEVELOPERS

- Claude Code for Developers
- AI Applications & Document Search with LangChain
- GitHub Agentic Development
- AI-Augmented Software Development
- AI Agent Engineering

TRACK 4 — GOVERNANCE & RESPONSIBLE DEPLOYMENT

- AI Governance & the EU AI Act

9 core AI programs across 4 tracks — Track 1 is refined and ready to deliver; Tracks 2–4 are offers prepared and tested with the client before commercialization. Plus a full Development Training catalogue and customizable Role-Based AI Programs (see final pages).

Programs for Non-Technical Teams

ChatGPT for Business Professionals

2 DAYS · FOUNDATION

Use ChatGPT as a real workspace — drafting, research, analysis and reliable deliverables. Moves from one-off prompts to a repeatable method: clear briefs, working from documents and data, custom instructions, Projects, and quality checks before use.

AUDIENCE

Managers, project leads, consultants and professionals in support, sales, marketing or communication roles

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Structure and refine a request · Analyze files and sources · Configure custom instructions and a Project · Formalize a business-specific assistant · Apply quality and confidentiality checks

CHATGPT

CUSTOM GPTS

AI Agents with Claude Cowork & ChatGPT Work

2 DAYS · INTERMEDIATE

For users already comfortable with AI assistants who want to delegate a multi-step professional mission. Covers scoping what an agent can access, produce and act on, placing human checkpoints correctly, then verifying sources, actions and results.

AUDIENCE

Non-developer power users, AI champions, consultants, project leads and business function managers

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Choose a mission suited to delegation · Define resources and permissions · Follow an agentic workflow · Verify outputs and actions · Test failure cases · Document a supervisable method

CLAUDE COWORK

CHATGPT WORK

Microsoft 365 Copilot (AB-730)

2 DAYS · FOUNDATION TO INTERMEDIATE

Use Microsoft 365 Copilot to save time on documents, meetings, messages and analysis — without losing control of sources or access. Alternates hands-on work in Word, Excel, PowerPoint, Outlook and Teams with Copilot Chat, Pages and Notebooks.

AUDIENCE

Microsoft 365 professionals, managers, project leads and Copilot adoption champions

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Write contextualized requests · Produce and validate content across Microsoft 365 apps · Use Pages, Notebooks and built-in agents · Design a business agent in Copilot Studio · Apply data-protection rules

MICROSOFT 365 COPILOT

COPILOT STUDIO

PURVIEW

Credentialed program — delivered by a Microsoft Copilot & AI Business Trainer (AB-730). Covers skills relevant to AB-730 preparation, without guaranteeing exam success.

Finance & Developer Programs

AI+ Finance Practitioner™

2 DAYS · FOUNDATION TO INTERMEDIATE

A structured, 8-module program on applying AI across the finance function — from data-driven decision-making to credit scoring, fraud detection, stock forecasting, blockchain and AI strategy.

AUDIENCE

Finance professionals, analysts and business teams working with financial data and operations

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Understand the AI technologies shaping modern finance · Apply AI to credit scoring, lending and fraud detection · Evaluate AI-driven stock market forecasting and its limits · Build a digital-first AI strategy for a finance function

Customization: exercises built around the client's own financial data and use cases.

Claude Code for Developers

2 DAYS · INTERMEDIATE

Learn to delegate scoped tasks on an existing codebase to a coding assistant — exploring a project, planning a change, generating code, testing, and reviewing diffs before merge — while keeping ownership of quality, security and maintainability.

AUDIENCE

Full-stack developers, tech leads and product teams with existing coding practice

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Scope a task clearly · Provide the right context · Drive code changes · Write and run tests · Review generated code and manage permissions

CLAUDE CODE

GIT

AI-Augmented Software Development

2 DAYS · INTERMEDIATE

Integrate AI assistants into everyday development — from requirement analysis to documentation. Compares usage across the IDE, terminal and code review, teaching teams to pick the right task to delegate and keep human validation.

AUDIENCE

Developers, tech leads and software engineering teams

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Break down a request · Use AI to code, test and document · Control quality and security · Formalize team rules

AI CODING ASSISTANTS

GIT

Advanced Developer & Governance Programs

AI Applications & Document Search with LangChain

2 DAYS · INTERMEDIATE

Build an application that answers from a defined document corpus with verifiable sources — connecting file loading, chunking, retrieval, answer generation and evaluation on real questions.

AUDIENCE

Python developers and teams prototyping internal document-search applications

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Design a RAG pipeline · Prepare documents · Select a retrieval method · Verify answers, citations, cost and access

PYTHON

LANGCHAIN

AI Agent Engineering

2 DAYS · ADVANCED

Design a supervised agent that uses tools to complete a multi-step software or business task — building a plan-and-execute loop, constraining access, handling errors and testing results.

AUDIENCE

Senior developers, application architects and automation teams

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Design a tool-using agent · Define state and permissions · Add validation and recovery · Evaluate quality and cost

PYTHON / JAVASCRIPT

LLM APIS

GitHub Agentic Development

2 DAYS · INTERMEDIATE TO ADVANCED

Explore delegating development tasks inside a GitHub workflow — from writing an actionable issue to reviewing a generated pull request, scoping permissions and integrating agents into team contribution rules.

AUDIENCE

Developers, repository maintainers, tech leads and software quality leads

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Delegate a precisely scoped task · Track an agent's actions · Review code, tests and security · Define team governance

GITHUB

CI

AI Governance & the EU AI Act

2 DAYS · FOUNDATION TO INTERMEDIATE

Help teams deploying AI make their usage visible, documented and controllable — inventorying tools, classifying risk, organizing human validation, and introducing EU AI Act concepts and their practical implications.

AUDIENCE

AI project leads, operations managers, adoption champions, compliance and security teams (co-facilitation)

FORMAT

Onsite · Virtual · Private Corporate

KEY OUTCOMES

Map AI usage across the organization · Identify data and risk · Define controls, roles and evidence · Prepare an action plan with the right specialists

Note: best delivered co-facilitated with a legal or compliance specialist for regulatory obligations — not a substitute for legal advice.

Development Training

10+ years as a Full-Stack Developer — able to deliver core software-development training alongside the AI programs, from web fundamentals to databases and project management.

Web & Front-End

[HTML](#) · [CSS](#) · [Bootstrap](#) · [JavaScript](#) · [React JS](#)

Build and deploy a responsive, interactive website from scratch.

Java

[Java SE](#) · [Java EE](#) · [Java OOP](#)

Structure an object-oriented back-end service in Java.

Python

[Python](#) · [Python OOP](#)

Build a Python application using object-oriented design.

PHP

[Procedural](#) · [OOP](#) · [MVC](#) · [Online Shop](#)

Build a functioning online shop — from procedural PHP to MVC architecture.

Databases

[SQL](#) · [PostgreSQL](#)

Design and query a relational database.

GitHub

[Git](#) · [GitHub](#)

Version a project and collaborate through branches, commits and pull requests.

Mobile Development

[Flutter](#)

Build and ship a cross-platform mobile app for iOS and Android.

CMS

[WordPress](#)

Build and publish a website using WordPress.

Project Management

[Agile](#)

Run a development project through Agile ceremonies — backlog, sprints, retrospectives.

AI-Assisted Development

[Claude](#) · [Codex](#)

Build and ship a real feature using an AI coding assistant end-to-end.

Digital Marketing & Analytics

[Google Ads](#) · [Google Tag Manager](#)

Set up a tracked ad campaign with Google Ads and Google Tag Manager.

Role-Based AI Programs

PRIOR DELIVERY EXPERIENCE

AI for HR

Job descriptions · onboarding content · internal communications · meeting summaries

PRIOR DELIVERY EXPERIENCE

AI for Real Estate

Client follow-up · property/project presentations · client requirement summaries · meeting preparation

CUSTOMIZABLE PROGRAM VARIANT

AI for Marketing

Campaign ideation · content creation · social media · creative briefs · AI video

PRIOR DELIVERY EXPERIENCE

AI for Banking / Financial Services

Document & executive summaries · meeting preparation · professional emails · responsible AI usage & human validation

CUSTOMIZABLE PROGRAM VARIANT

AI for Sales

Prospect research · emails · meeting preparation · follow-ups & proposals

CUSTOMIZABLE PROGRAM VARIANT

AI for Managers

AI adoption decisions · productivity use cases · team enablement priorities

SELECTED TRAINING ORGANIZATIONS

M2I Formation · AFPA · WebForce3 · IIM Digital School · Morgan International · Octus Mindz Training · OFPPT

30+ organizations across Europe, North Africa and the UAE.

LOCATION & AVAILABILITY

Dubai, UAE — UAE Resident

Available for onsite delivery across the UAE & GCC · Available for international virtual delivery

Corporate pricing available upon request
